A
Candidate generation and deterministic relation guard
Legal task inputs
LLM candidate generation
Raw triples + confidence + evidence
Relation-only guard
Accepted graph + audit trail
confidence | verbatim evidence | canonicalization | self-loop / generic predicate | max 8
B
Frozen evidence chain and stopping decisions
Blind prefix over-generation
Relation-only guard GS improves
Nonce holdout F1 0.8571
Official transfer 0 / 101 TP
Predicate routing 2 / 5 samples
STOP no deployment
Failed gates prohibit same-slice prompt repair, recalibration, n>=100 expansion, and deployment.
